ANCESTRY LIBRARY FREE TRAINING

For patrons who are interested in finding
genealogy information.

The training includes a tour of a premium web site, Ancestry Library, accessible free from the library. The class will show you how to uncover family history as you data-mine the library's digital family archives. This class will cover the types of content you will find, such as images from the U.S. Census and the functionality of the site that will help you complete your family's narrative story. Sign up today to learn how making small changes in your library programming can lead to big changes in the lives of your library patrons!

**NO REGISTRATION
